Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12, 13/11, 13/12/11, 16, 17, 18, 19/17 and 19/18/17 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,533,068 to Meierhoefer.

Meierhoefer shows a device for delivering product into an eye, as seen in Figs. 9 and 12, having an outlet portion 112 substantially bowl like shape, a valve 120 made of an elastic material and actuated by the pressure of the fluid to be dispensed and having a flange 76, a vent hole 106 in communication with the flow passage, a hydrophobic air filter 108, a locking member 88 and plug delimitating the flow passage and integrally formed with the valve and a valve seat 78.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,533,068 to Meierhoefer in view of US 5,360,145 to Gueret.

Meierhoefer shows all claimed features as discussed above except for the valve or the outlet being treated with an antibacterial treatment. Gueret shows a dispenser device as seen in Fig. 8, where the elements of the dispensing channel are treated with an antibacterial compound. It would have been obvious to a person with ordinary skill in the art at the time of the invention to treat the dispensing channel of the device of Meierhoefer with an antibacterial treatment to prevent any degradation of product due to impurities that might have made their way into the dispensing channel as taught by Gueret.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morane shows an atomizer with air inlet valve. Kanner shows a liquid dispenser nozzle.
